Our story

«The Journey is the destination» is Memo's motto: the time of the journey is an integral part of the experience, it is essential for the encounter with beauty to occur. Creating a perfume is part of the same movement; it is also a matter of patience and high standards in order to achieve the desired olfactory landscape. It is faithful to this vision of beauty that Memo redraws the map of a sensitive world rich in emotions, by creating a unique olfactory world map.

The origin

The Parisian fragrance house launched in 2007 by Clara Molloy and her husband John sees fragrance as a journey, forging its identity around magical destinations and potent raw materials. This desire for travels to far-off places and encounters is the very reflection of the founding couple:
she, the Parisian-Catalan poet,
he, the sporty Irish globetrotter.

INLÉ

An osmanthus submerged in a cloud of tea

Time stands still over Inlé lake in Burma. This fragrance reflects that tranquility. With its **jasmine**, **mate** and **osmanthus** absolutes, this floral fragrance offers a trail of floating gardens and orchards from Asia. A shimmering lake, the golden sky. Wandering clouds, radiant lights. Inlé.
